Work
Implement or test design solutions.
Develop or test photonic prototypes or models.
Test or evaluate photovoltaic (PV) cells or modules.
Review specifications and recommend enhancements or
Review or negotiate energy purchase agreements.
Analyze, fabricate, or test fiber-optic links.
Design, integrate, or test photonics systems or components
Evaluate robotic systems or prototypes
Read current literature, talk with colleagues, continue educatio...
Monitor and analyze energy consumption.
Conduct research on new photonics technologies
